CONSIDERABLE COMPIAINT IS made by western fruit growers of the ravages of the apple curcuito. This insect is similar in its work to the the pium curculo, but is distinct from it. Jarring the trees does not dislodge it as it will the plum curculo, aside from the fact that apple trees, after a few years, attain a size which makes jarring impossible. Keeping pigs in the orchards to eat the fruit as it falls is the best remedy for all this, as it is for 00 in excess of the previous year. The apple magnot. the apple maggot.

New Fair Company Meeting.

The Stockholders of the new fair company met at the court house, Saturday afternoon at two o'clock, Mr. James W. Fitzgerald in the chair.

The report of the committee on membership was read and the committee continued one week longer.

A charter to govern organization was read and manimously adopted.

After adoption of the charter, the chairman, in a pleasant and appropriate manner, returned his thanks to the members for their kindness toward him, congratulated them upon their undertaking, and declared the Young Men's Kentucky Fair Company a "full fielged" corporation.

An Opportunity for a Fortuse Lori.

REV. RUSSELL. CECIL. of Nicholasville, Ky., will preach at the Third street Presbyterian Chrech next Sunday morning and evening. He is spoken of as one of the most taiented preschers of the age in the State. All are invited to attend.

The public is requested to bear in mind the supper by the ladies of the Chester Church, only Friday and Saturday evenings. As it is a movement for the benefit of the church, it ought to be a pleasure to all good Ecitizons to encourage it.

Os Monday morning as a train on the Kentucky Central jwas coming North from Winchester and nearing Rennick's Station, a negro named Lev. Ruiley was discovered sleeping on the track. The whistle was sounded, but the man was alow in awakening and when he arose on one albow the locomotive struck him and injured him it is thought fatality.

The amount of taxes paid on distilled liquors is a fair indication of the amount of distilled liquors drank. That revenne for 1884 was \$76,605,385, or nearly 3,000,000 in excess of the previous year. The figures for each five years since the present rate of tax was made in 1885 have been—1805, \$18,751,422; 1870, \$40,281,518; 1875, \$22,081,901, and 1898, 681,185,500, showing conclusively that the 55,000,000 of people in 1884 did not, as has been frequently stated, drink less distilled liquors than did the 31,000,000 in 1890, lager making the change. The figures on fermented liquors show at deady increase of not less than \$500,000 a year from \$638, 934 in 1853 to \$14,000,015 in 1894.
